

**TITLE 13        INSURANCE**  
**CHAPTER 9     LIFE INSURANCE AND ANNUITIES**  
**PART 16        USE OF 2001 COMMISSIONERS STANDARD ORDINARY MORTALITY TABLE**

**13.9.16.1        ISSUING AGENCY:** New Mexico Public Regulation Commission, Insurance Division.  
[13.9.16.1 NMAC - N, 1-1-04]

**13.9.16.2        SCOPE:** This rule applies to all life insurance companies issuing life insurance policies.  
[13.9.16.2 NMAC - N, 1-1-04]

**13.9.16.3        STATUTORY AUTHORITY:** Sections 59A-2-9, 59A-8-5 and 59A-20-31 NMSA 1978.  
[13.9.16.3 NMAC - N, 1-1-04]

**13.9.16.4        DURATION:** Permanent.  
[13.9.16.4 NMAC - N, 1-1-04]

**13.9.16.5        EFFECTIVE DATE:** January 1, 2004, unless a later date is cited at the end of a section.  
[13.9.16.5 NMAC - N, 1-1-04]

**13.9.16.6        OBJECTIVE:** The purpose of this rule is to recognize, permit and prescribe the use of the 2001 commissioners standard ordinary (CSO) mortality table in accordance with Section 59A-8-5 NMSA 1978, Standard Valuation Law, Life Insurance and Annuities, Section 59A-20-31 NMSA 1978, Standard Nonforfeiture Law, Life Insurance, and 13.9.13 NMAC, Valuation of Life Insurance Policies.  
[13.9.16.6 NMAC - N, 1-1-04]

**13.9.16.7        DEFINITIONS:**

**A.        2001 CSO Mortality Table** means that mortality table, consisting of separate rates of mortality for male and female lives, developed by the American academy of actuaries CSO task force from the valuation basic mortality table developed by the society of actuaries individual life insurance valuation mortality task force, and adopted by the national association of insurance commissioners ("NAIC") in December 2002. The 2001 CSO mortality table is included in the proceedings of the NAIC (2nd Quarter 2002). Unless the context indicates otherwise, the "2001 CSO mortality table" includes both the ultimate form of that table and the select and ultimate form of that table and includes both the smoker and nonsmoker mortality tables and the composite mortality tables. It also includes both the age-nearest-birthday and age-last-birthday bases of the mortality tables.

**B.        2001 CSO mortality table (F)** means that mortality table consisting of the rates of mortality for female lives from the 2001 CSO Mortality Table.

**C.        2001 CSO mortality table (M)** means that mortality table consisting of the rates of mortality for male lives from the 2001 CSO mortality table.

**D.        Composite mortality tables** means mortality tables with rates of mortality that do not distinguish between smokers and nonsmokers.

**E.        Smoker and nonsmoker mortality tables** means mortality tables with separate rates of mortality for smokers and nonsmokers.

[13.9.16.7 NMAC - N, 1-1-04]

**13.9.16.8        2001 CSO MORTALITY TABLE:**

**A.** At the election of the company for any one or more specified plans of insurance and subject to the conditions stated in this regulation, the 2001 CSO mortality table may be used as the minimum standard for policies issued on or after January 1, 2004 and before the date specified in Subsection B to which Subparagraph (a) of Paragraph (1) of Subsection B of Section 59A-8-5 NMSA 1978, Subparagraph (f) of Paragraph (7) of Subsection F of Section 59A-20-31 NMSA 1978, and 13.9.13.12 and 13.9.13.13 NMAC are applicable. If the company elects to use the 2001 CSO mortality table, it shall do so for both valuation and nonforfeiture purposes.

**B.** Subject to the conditions stated in this rule, the 2001 CSO mortality table shall be used in determining minimum standards for policies issued on and after January 1, 2009, to which Subparagraph (a) of Paragraph (1) of Subsection B of Section 59A-8-5 NMSA 1978, Subparagraph (f) of Paragraph (7) of Subsection F of Section 59A-20-31 NMSA 1978, and 13.9.13.12 and 13.9.13.13 NMAC are applicable.

[13.9.16.8 NMAC - N, 1-1-04]

**13.9.16.9 CONDITIONS:**

- A.** For each plan of insurance with separate rates for smokers and nonsmokers an insurer may use:
- (1) composite mortality tables to determine minimum reserve liabilities and minimum cash surrender values and amounts of paid-up nonforfeiture benefits;
  - (2) smoker and nonsmoker mortality tables to determine the valuation net premiums and additional minimum reserves, if any, required by Subparagraph (e) of Paragraph (1) of Subsection E of Section 59A-8-5 NMSA 1978, and use composite mortality tables to determine the basic minimum reserves, minimum cash surrender values and amounts of paid-up nonforfeiture benefits; or
  - (3) smoker and nonsmoker mortality to determine minimum reserve liabilities and minimum cash surrender values and amounts of paid-up nonforfeiture benefits.
- B.** For plans of insurance without separate rates for smokers and nonsmokers the composite mortality tables shall be used.
- C.** For the purpose of determining minimum reserve liabilities and minimum cash surrender values and amounts of paid-up nonforfeiture benefits, the 2001 CSO mortality table may, at the option of the company for each plan of insurance, be used in its ultimate or select and ultimate form, subject to the restrictions of 13.9.16.10 NMAC and 13.9.13 NMAC relative to use of the select and ultimate form.
- D.** When the 2001 CSO mortality table is the minimum reserve standard for any plan for a company, the actuarial opinion in the annual statement filed with the commissioner shall be based on an asset adequacy analysis as specified in 13.2.6.8 NMAC, actuarial opinions and memoranda. A commissioner may exempt a company from this requirement if it only does business in this state and in no other state.  
[13.9.16.9 NMAC - N, 1-1-04]

**13.9.16.10 APPLICABILITY OF THE 2001 CSO MORTALITY TABLE TO 13.9.13 NMAC:**

- A.** The 2001 CSO mortality table may be used in applying 13.9.13 NMAC in the following manner, subject to the transition dates for use of the 2001 CSO mortality table in Section 4 of this rule (unless otherwise noted, the references in this section are to 13.9.13 NMAC):
- (1) **Subparagraph (b) of Paragraph (2) of Subsection B of Section 2:** The net level reserve premium is based on the ultimate mortality rates in the 2001 CSO Mortality Table.
  - (2) **Subsection B of Section 7:** All calculations are made using the 2001 CSO mortality rate, and, if elected, the optional minimum mortality standard for deficiency reserves stipulated in Paragraph 4. The value of "qx+k+t-1" is the valuation mortality rate for deficiency reserves in policy year k+t, but using the unmodified select mortality rates if modified select mortality rates are used in the computation of deficiency reserves.
  - (3) **Section 12:** The 2001 CSO mortality table is the minimum standard for basic reserves.
  - (4) **Section 13:** The 2001 CSO mortality table is the minimum standard for deficiency reserves. If select mortality rates are used, they may be multiplied by X percent for durations in the first segment, subject to the conditions specified in Sections 5B(3)(a) to (i). In demonstrating compliance with those conditions, the demonstrations may not combine the results of tests that utilize the 1980 CSO mortality table with those tests that utilize the 2001 CSO mortality table, unless the combination is explicitly required by regulation or necessary to be in compliance with relevant actuarial standards of practice.
  - (5) **Section 17:** The valuation mortality table used in determining the tabular cost of insurance shall be the ultimate mortality rates in the 2001 CSO mortality table.
  - (6) **Subsection E of Section 19:** The calculations specified in Section 19 shall use the ultimate mortality rates in the 2001 CSO mortality table.
  - (7) **Subsection E of Section 20:** The calculations specified in Section 20 shall use the ultimate mortality rates in the 2001 CSO mortality table.
  - (8) **Subsection B of Section 21:** The calculations specified in Section 21 shall use the ultimate mortality rates in the 2001 CSO mortality table.
  - (9) **Subparagraph (b) of Paragraph (1) of Subsection A of Section 23:** The one-year valuation premium shall be calculated using the ultimate mortality rates in the 2001 CSO mortality table.
- B.** Nothing in this section shall be construed to expand the applicability of 13.9.13 NMAC to include life insurance policies exempted by Subsection B of 13.9.13.2 NMAC.  
[13.9.16.10 NMAC - N, 1-1-04]

**13.9.16.11 GENDER-BLENDED TABLES:**

**A.** For any ordinary life insurance policy delivered or issued for delivery in this state on and after January 1, 2004, that utilizes the same premium rates and charges for male and female lives or is issued in circumstances where applicable law does not permit distinctions on the basis of gender, a mortality table that is a blend of the 2001 CSO mortality table (M) and the 2001 CSO mortality table (F) may, at the option of the company for each plan of insurance, be substituted for the 2001 CSO mortality table for use in determining minimum cash surrender values and amounts of paid-up nonforfeiture benefits. No change in minimum valuation standards is implied by this subsection.

**B.** The company may choose from among the blended tables developed by the American academy of actuaries CSO task force and adopted by the NAIC in December 2002.

**C.** It shall not, in and of itself, be a violation of Section 59A-16-13 NMSA 1978 for an insurer to issue the same kind of policy of life insurance on both a sex-distinct and sex-neutral basis.
