## Children’s use definition

**ANSI-2009 Section 106.**  
**Children’s use:** Spaces and elements specifically designed for use primarily by people 12 years old and younger.

## Scoping

**E112 - Children’s Standards.** The technical requirements in the main body of the 2015 International Building Code are based on adult dimensions and anthropometrics. This section contains technical requirements based on children’s dimensions and anthropometrics in addition to those in ICC ANSI - A117.1 2009.

### Scoping

**E112.1.** The predominant use of an element (rather than a building or facility) shall guide the determination of whether to use specifications for adults or children for that element. If children are the primary users of the element, children’s specifications shall be applied.

### Scoping

**E112.2 - Children’s Accessible Elements.** When children are the primary users of a building or facility (such as day care centers, schools, children’s areas of libraries, etc.), the accessibility standards shall correspond to the children’s provisions of this section.
