20.2.71.110 FEE REQUIREMENT

A. An annual operating permit emission fee shall be paid to the department by each owner or operator subject to this part.

B. The fee shall be assessed:

(1) for a major source as defined in 20.2.70 NMAC (Operating Permits), for all emissions units;

(2) for all other stationary sources, for emissions units which cause the source to be subject to 20.2.70 NMAC; and

(3) for emissions above annual allowable emission limits for the source categories in Paragraphs (1) and (2) of Subsection B of Section 20.2.71.110 NMAC.

C. The fee shall be calculated in conformance with 20.2.71.111 NMAC.

[11/30/95; 20.2.71.110 NMAC - Rn, 20 NMAC 2.71.110 10/31/02; A, 12/15/04]

20.2.71.111 FEE DETERMINATION

A. Fee calculation.

(1) The annual fee shall be calculated by taking the product of the allowable emission rate for each fee pollutant expressed in tons per year and the appropriate fee per ton of pollutant listed in 20.2.71.112 NMAC.

(2) The allowable emission rate which shall be used in the fee calculation is:

(a) the allowable emission rate which exists on December 31 for each year; and

(b) the failure of an owner or operator to include the correct information in a permit application, resulting in incorrect allowable emissions in a permit issued under 20.2.70 NMAC, 20.2.72 NMAC, or 20.2.74 NMAC, shall not preclude the department from requiring payment for the correct emissions from the time payment would have been first due.

(3) Allowable emission rates shall be calculated to the tenth of a ton for each emission unit and then summed to determine the tons per year for the facility. Total facility tons per year quantities shall be determined by rounding amounts equal to or greater than five tenths of a ton upward and amounts lower than five tenths of a ton downward.

(4) Emissions from those operations determined to be insignificant activities by the department under 20.2.70 NMAC shall not be included in the fee calculation.

(5) Fugitive emissions which have an allowable emission rate shall be included in the fee calculation.

(6) Any quantity of a pollutant which is assessed a fee because it is a hazardous air pollutant shall not be assessed additional fees.

(7) A maximum of six thousand tons per year of any one fee pollutant shall be used in the fee calculation.

B. Source shutdown.

(1) The annual fee shall not be reduced due to lack of operation of any emissions unit, except when:

(a) the discontinued operation is accounted for in an allowable emission rate contained within a construction or operating permit issued by the department;

(b) a construction or operating permit issued by the department has been discontinued or terminated and the source ceased operation; or

(c) the emissions unit is located at a stationary source which meets the criteria of Paragraph (2) of Subsection B of 20.2.71.111 NMAC.

(2) The annual fee shall be reduced when all operations at a stationary source have been shutdown for a period greater than 60 consecutive days within a calendar year. In this case, the fee calculation shall be adjusted by reducing the annualized allowable emission rate, or potential to emit if applicable, for each day the stationary source was shutdown.

C. Fee for emissions above annual allowable emission limits.

(1) The fee for emissions above annual allowable emission limits shall be based on all emissions above annual allowable emission limits of fee pollutants reported or required to be reported by a stationary source through December 31 in accordance with Subsection E of 20.2.70.302 NMAC. The fee shall be calculated by taking the product of the emissions above annual allowable emission limits for each fee pollutant above and beyond the allowable annual emissions limit per unit expressed in tons per year and the appropriate fee per ton of pollutant listed in 20.2.71.112 NMAC.

(2) Total facility tons per year quantities of emissions above annual allowable emission limits shall be determined by rounding amounts equal to or greater than five tenths of a ton upward and amounts lower than five tenths of a ton downward.

(3) Any quantity of a pollutant which is assessed a fee pursuant to this section because it is a hazardous air pollutant shall not be assessed additional fees pursuant to this section.

(4) A maximum of six thousand tons per year of any one fee pollutant shall be used in the fee calculation for this section.

A. The fee for each fee pollutant shall be \$20.00 per ton on an annual basis, except as provided for in Subsection B of 20.2.70.112 NMAC. This fee shall increase by \$2.00 per ton on an annual basis beginning on January 1, 2010 through the fees due on June 1, 2012.

B. The fee for each hazardous air pollutant shall be \$165.00 per ton on an annual basis for any stationary source which is only major as defined in 20.2.70 NMAC for any hazardous air pollutant.

C. Fees for mercury emissions.

(1) For the calendar years 2010 through 2017, the fee for mercury emissions from stationary sources subject to 20.2.85 NMAC shall be \$8.88 per ounce annually.

(2) For the calendar years 2018 and thereafter, the fee for mercury emissions from stationary sources subject to 20.2.85 NMAC shall be \$22.51 per ounce annually.

D. The fee per ton of emissions above annual allowable emission limits shall be identical to the fee per ton of allowable emissions.

E. Beginning on January 1, 2009, the fees referenced in this section shall be changed annually by the percentage, if any, of any annual increase in the consumer price index in accordance with Section 502(b)(3)(B)(v) of the federal Clean Air Act.

(1) Fees shall be remitted in the form of a certified check or money order made payable to the environment department and submitted to the air quality bureau at the address specified in the notice.

(2) Upon receipt of the check or money order, it shall be deposited in the state air quality permit fund.

C. Nonpayment. Failure to remit the full fee required by the due date specified in this section is a violation of this part and may subject the owner or operator to:

(1) civil penalties for each day of noncompliance as provided for in the New Mexico Air Quality Control Act, section 74-2-12.1, NMSA 1978;

(2) the enforcement provisions of the New Mexico Air Quality Control Act, section 74-2-12, NMSA 1978, which includes suspension or revocation of any permit.
